

# COUNTRY COUNCIL UPDATE

We have had an extraordinary few months in the Country Councils with many campaigns created, running and due to run to support the people in those countries that are represented - we encourage you to sign up if you do not yet have a representative in your country, or reach out to your representative if you have not done so yet.

*Fresh off the press:*

**WCH Austria** attended the broad coalition of concerned citizens' groups to protect the sovereignty of the people against the WHO pandemic treaty and the International Health Regulations on Friday 11th Jul:

<https://www.worldcouncilforhealth.org/event/solidarity-without-borders/>

**WCH Bermuda** has written to extend the wish of the people to curtail experimental vaccinations in the population, due to the evidence of harm around the world and at home: <https://www.worldcouncilforhealth.org/letter-from-wch-bermuda-in-response-to-ministry-of-health-vaccination-drive/>.

**WCH Australia** has completed a successful month-long webinar series with an international audience highlighting many different aspects of health and wellbeing with experts from Australia and abroad to support health sovereignty for all.

**WCH Brazil** continues with its wide-reaching popular campaign to remove the Covid-vaccinations from the childhood schedule and protect Brazilian children. This campaign has now been running for over a month and is moving from state auditorium to state auditorium for parents to come and seek information and redress. Although 'just' removing these gene-altering injections from the childhood schedule may not seem like enough to some, activists and concerned medical professionals have started what looks to be an ongoing campaign that will extend its reach with time. Our children are our future.

**WCH Japan Coalition** has currently disbanded due to various technicalities, including the official resignation of Dr Tess Lawrie as director last December, and the resignation of members of the steering committee, causing the organisation to not be currently practicable. (Although Dr Lawrie's name still appears on the website, she did resign seven months ago and still awaits the amendment of the website and other). We await new representation from the honourable people of Japan, who number in the many thousands supporting the Better Way Principles and grassroots movement for health sovereignty and wellbeing.

**World Council for Health is an international grassroots organisation dedicated to co-creating a better way with all people based on the Better Way Principles, namely:**

- We act in honour and do no harm
- We have free will
- We are part of nature
- Spirituality is integral to our wellbeing
- We thrive together
- We value different perspectives
- We use technology with discernment.

*NOTE: It has been brought to our attention that Dr Tess Lawrie's name is listed as a Director on the WCH Japan Coalition website and in a recent newsletter. Dr Lawrie would like to clarify that she officially resigned from WCH Japan Coalition on the 15 December 2024. She has requested that her name be removed with immediate effect from the website and all marketing material.*
