

World Council For Health

There's a better way!

Who We Are

Founded in 2021, the World Council for Health is a non-profit initiative of EbMCsquared CIC, a community interest organization.

We are an international, grassroots collaboration with over **200** partners in **54** countries, including an ever-growing number of Country Councils.

We aim to unite people in all countries around our **7 Principles of a Better Way**, co-creating a better way for humanity.

Our Mission

We believe in a healthy, free and sovereign world, where everyone has what they need to generate, sustain, and protect our own health and that of our loved ones, our communities and our environment.

Our worldwide mission includes:

- Raising awareness on the root cause of dis-ease
- Advocating for health and self-determination
- Co-creating new integrated and ethical systems.
